The body

cut
fold

Cut along the solid line. Fold the sides BACKWARDS along the dashed lines so the robot can stand.

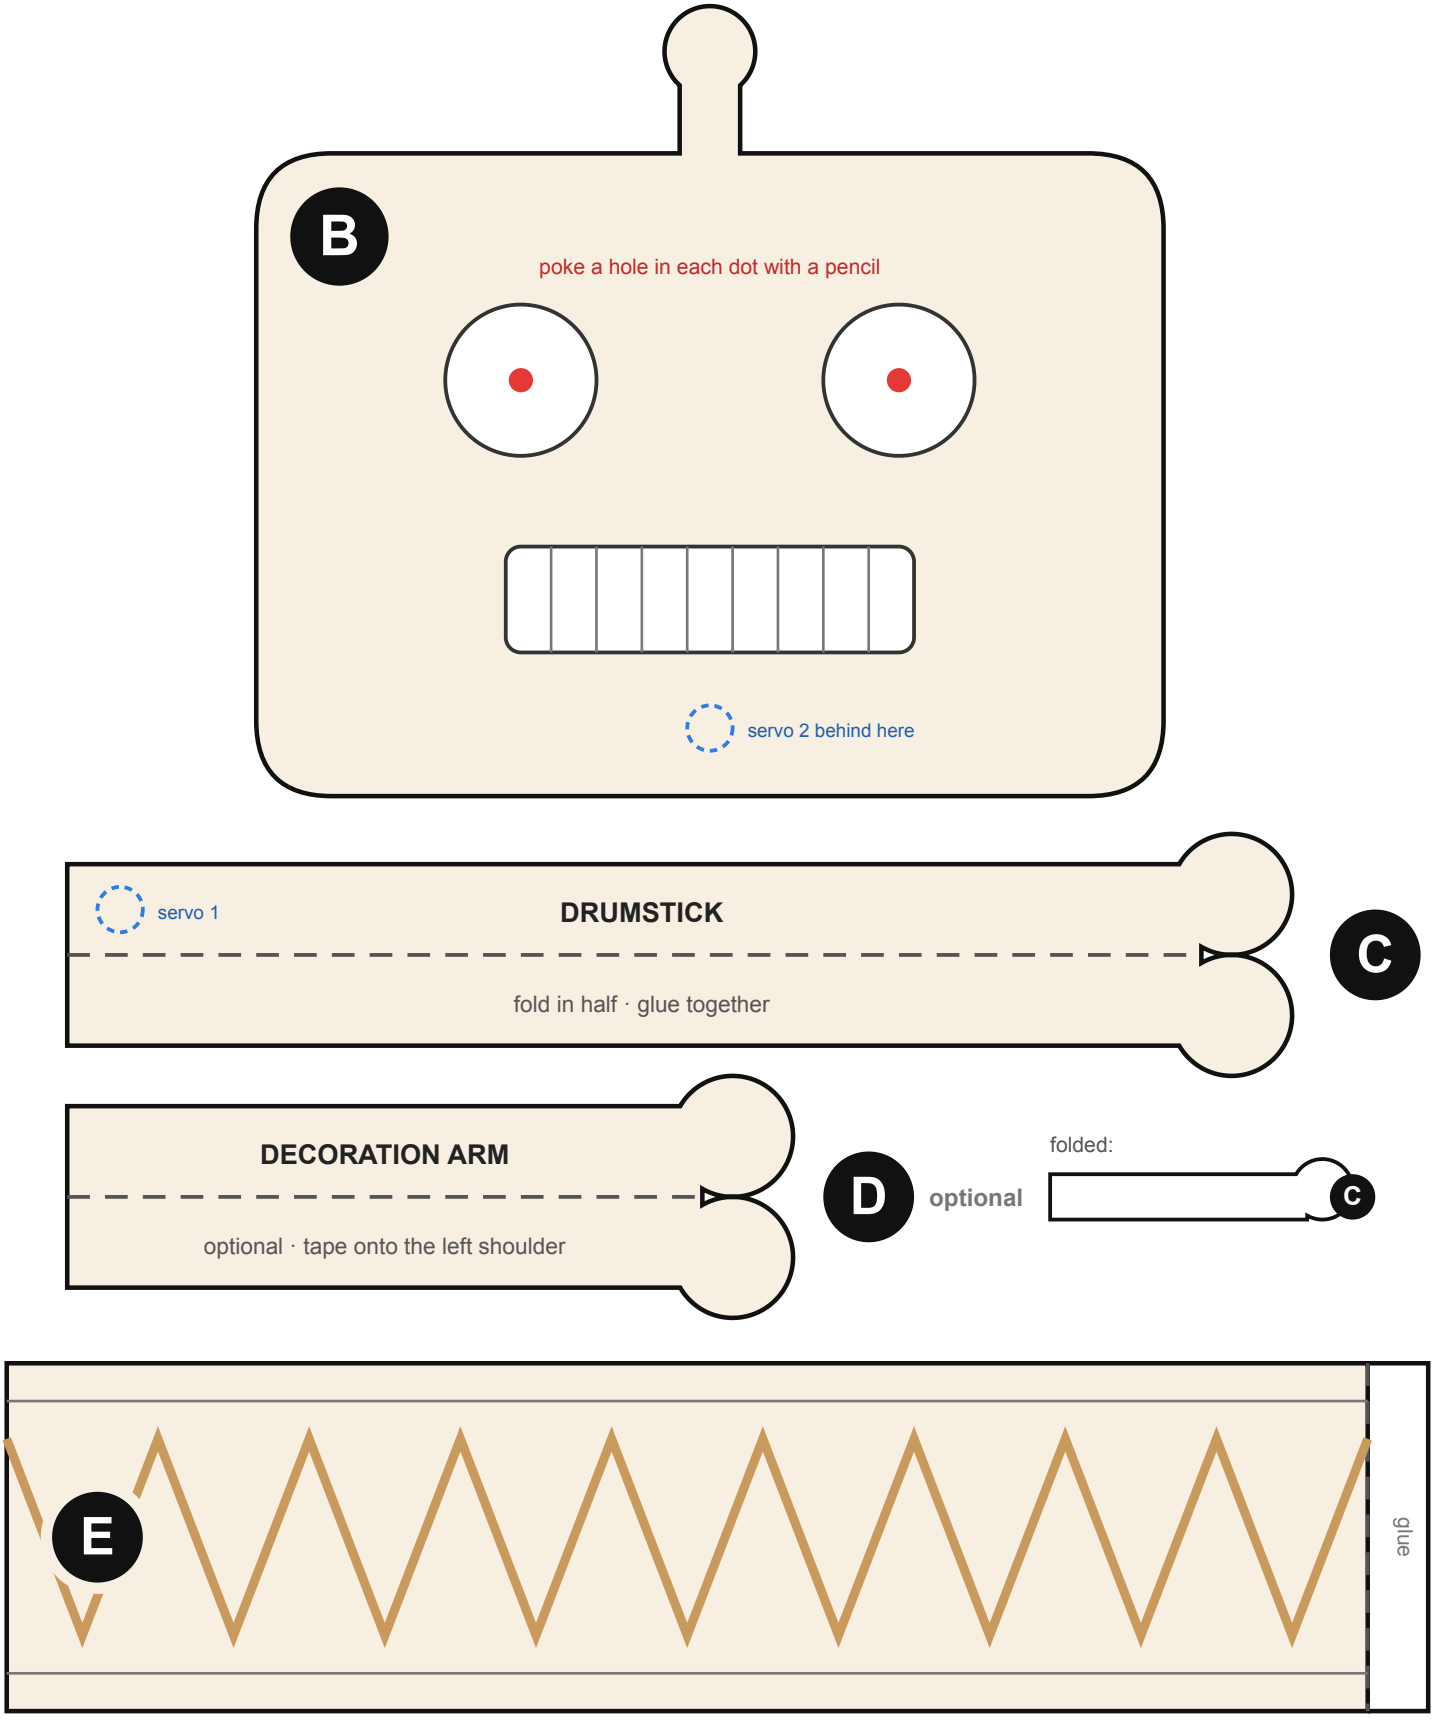

Tip: glue the body onto thin card (e.g. a cereal box) if the paper is too floppy.

Head, arms and drum

cut
fold

Cut out all the parts. Fold the arms in half and glue them together so they get stiff.

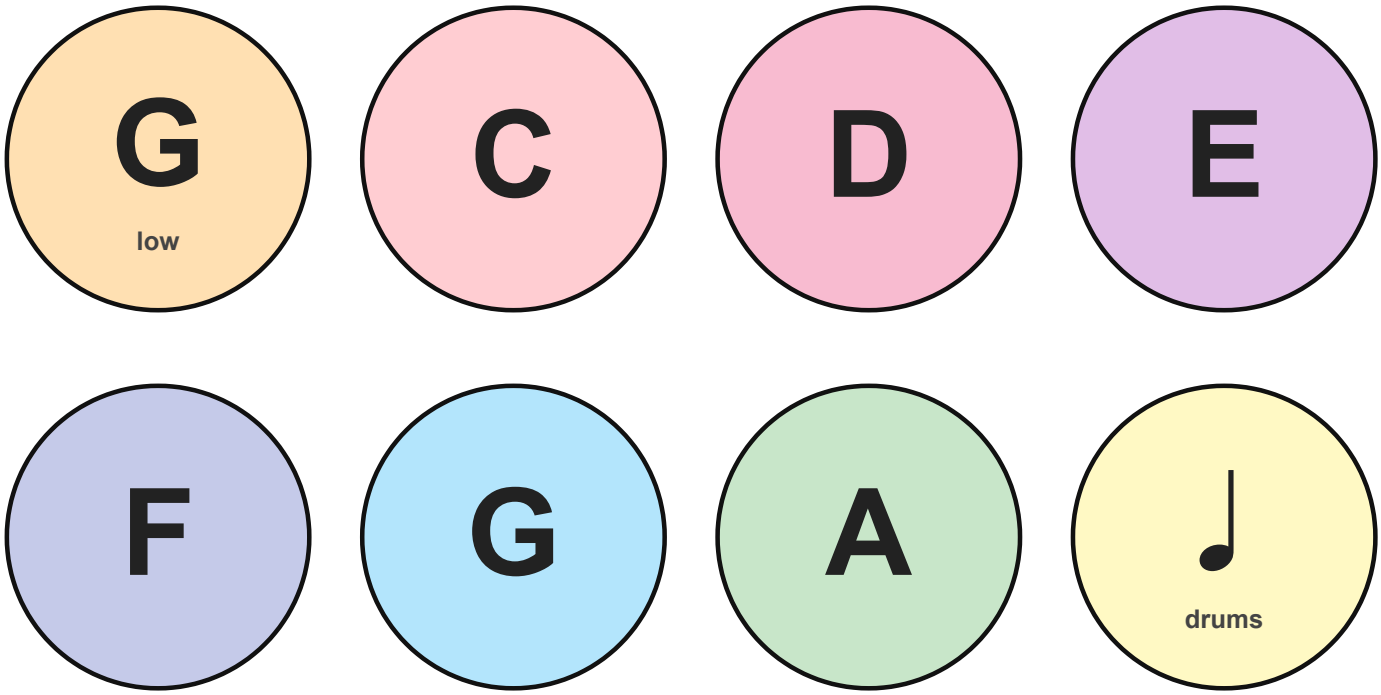

DRUM · roll into a tube, tape the tab inside

cut
fold

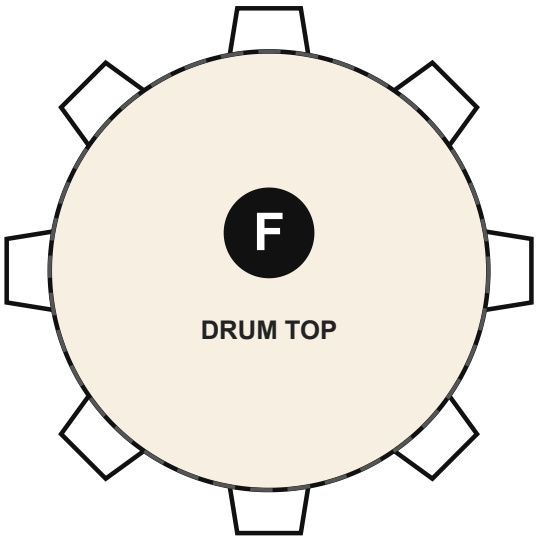

Note badge, drum top and decorations

Cut out ONLY your own note badge and glue it on the robot's chest. Colour the decorations and cut them out.

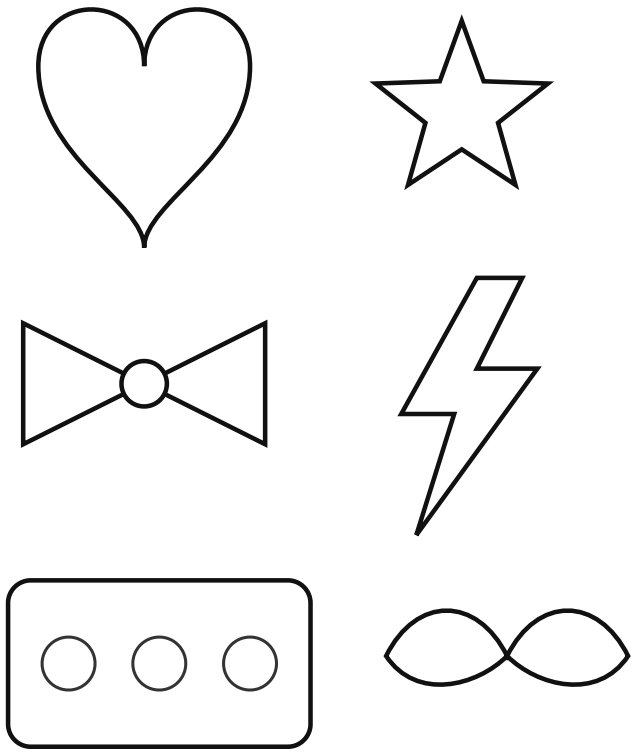

G note badges · one for each robot

H DECORATIONS

cut out the tabs, fold them down, glue onto E

Draw your own too: hair, ears, a hat, a cape… it's YOUR robot!

Wiring on the sensor shield

Servo 1 · arm	**P1**	brown → G · red → V · orange → S
Servo 2 · head	**P2**	brown → G · red → V · orange → S
LED eye, left	**P8**	long leg → S · short leg → G
LED eye, right	**P13**	long leg → S · short leg → G

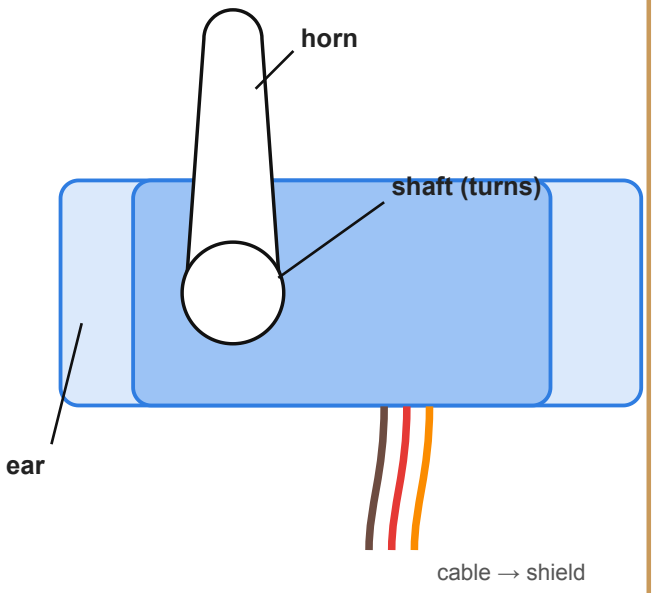

Print check: this line must be exactly 5 cm. Print at 100% / "actual size".

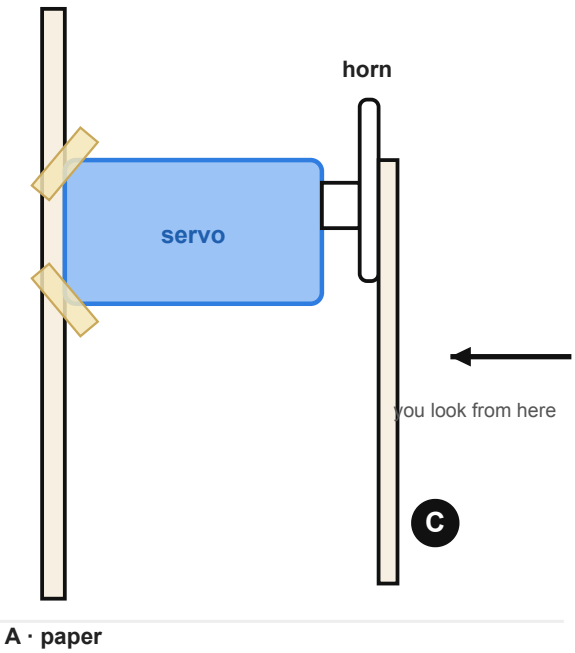

How the servos sit

The servo lies flat on the paper, and the shaft points at you.

cut
fold

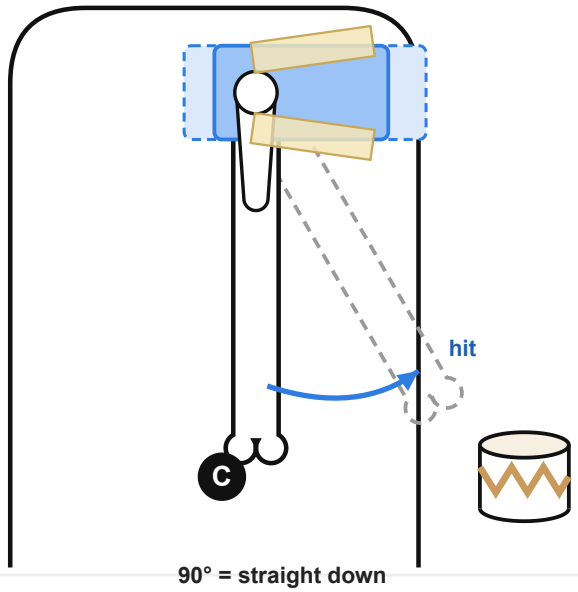

The servo's parts

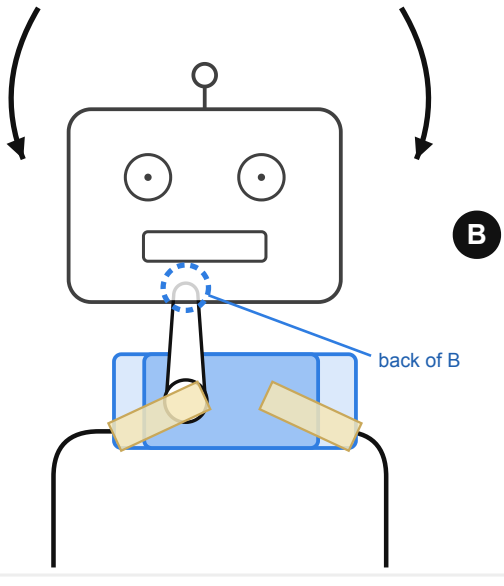

A · paper

Seen from the side

90° = straight down

Arm: C hangs down and swings

Head: B is taped on the horn and tilts

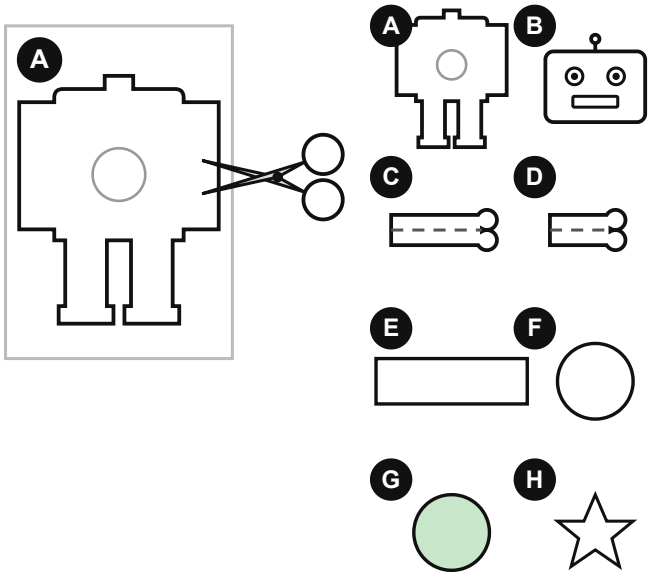

1 servo flat · 2 servo-center · 3 tape C and B on the horn

Build your robot

Follow the pictures, step by step.

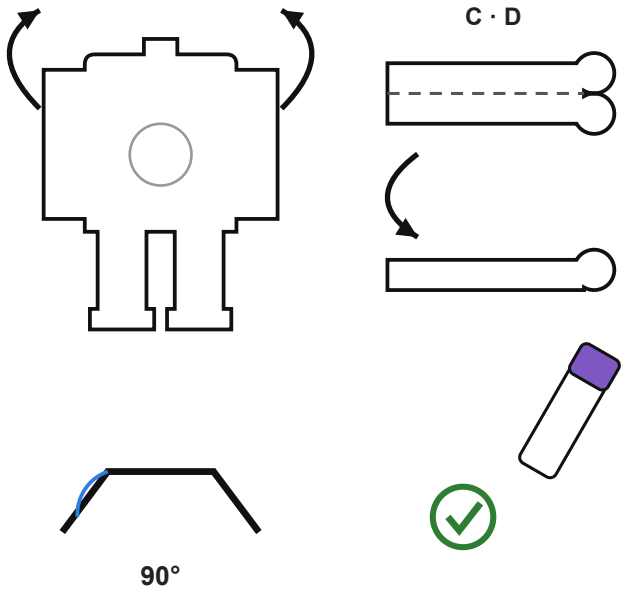

cut
fold

1

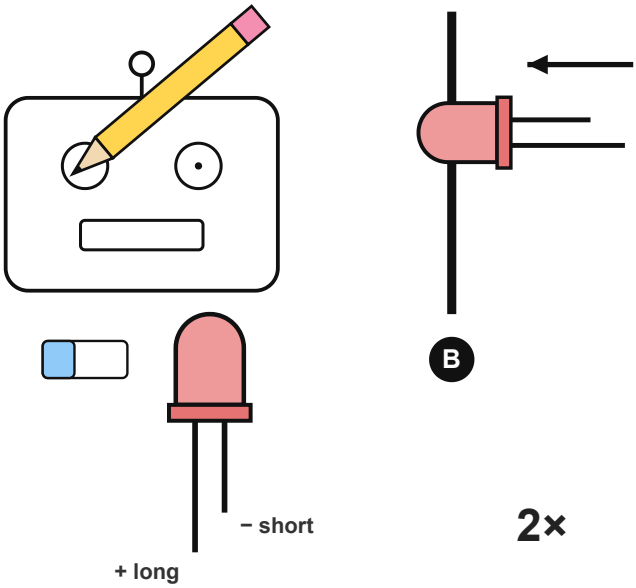

Cut out parts A–H

2

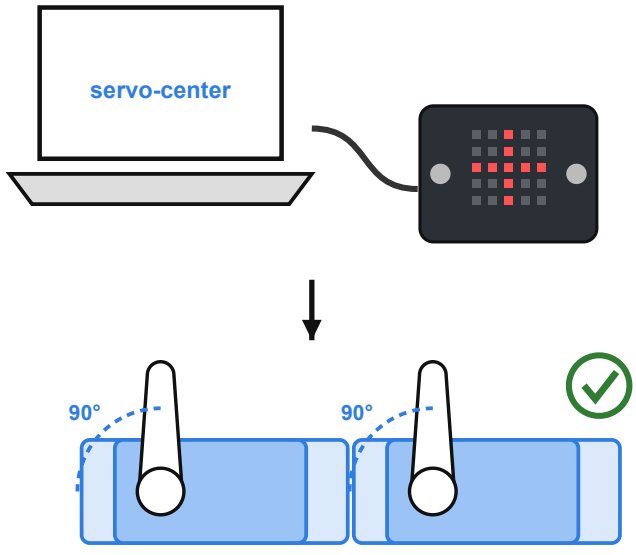

Fold A backwards · fold and glue C + D

3

Poke holes in B · LEDs in from behind

4

Run servo-center → both servos at 90°

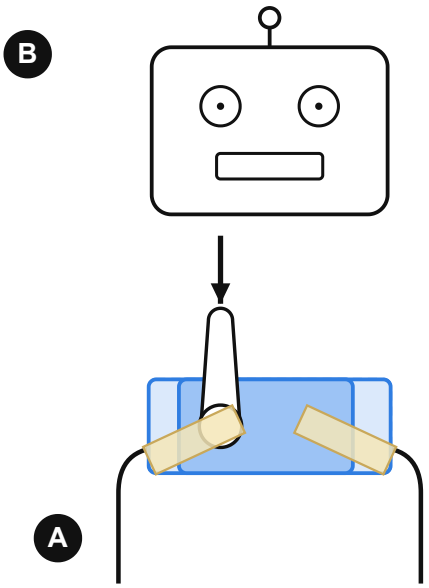

Build your robot

Follow the pictures, step by step.

cut

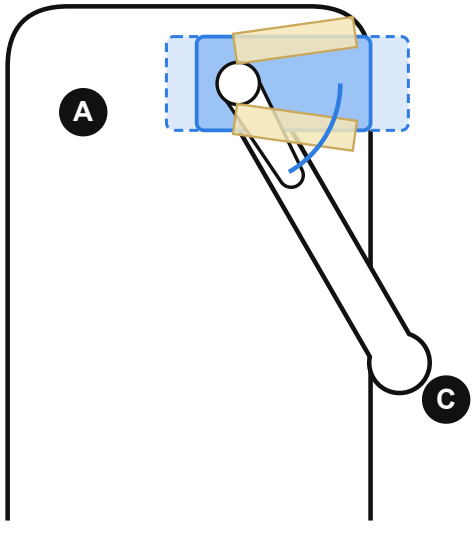

fold

5

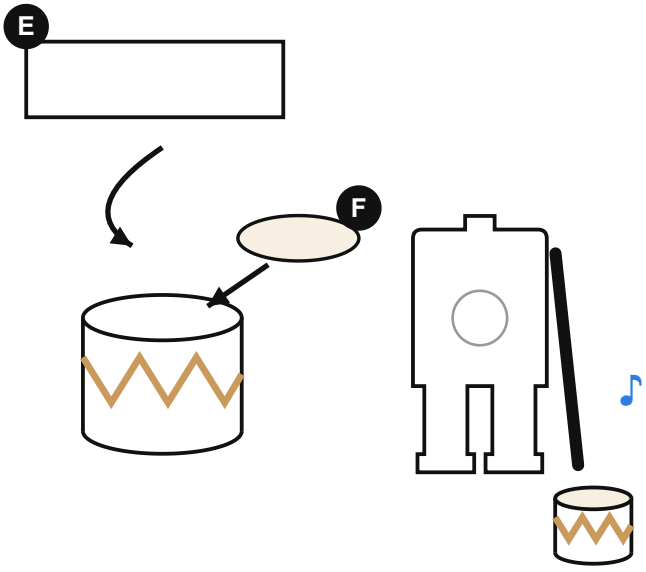

Servo on the neck · B on the servo arm

6

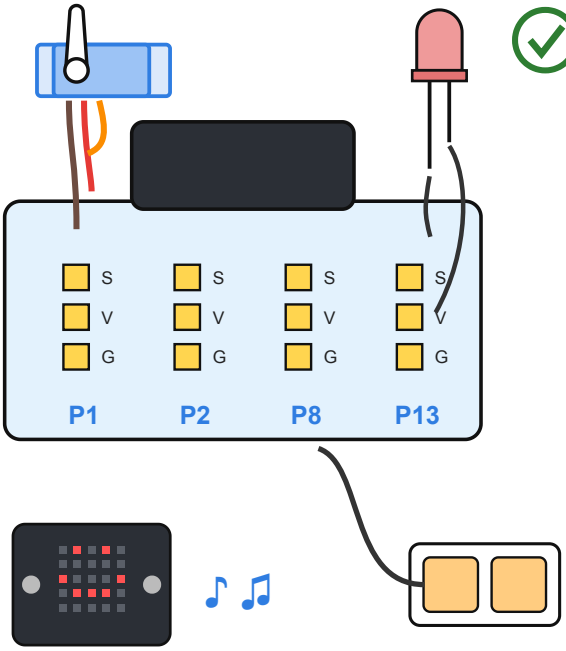

Servo on the shoulder · C points down at an angle

7

Roll E · glue F on · place it by the leg

8

Connect · switch on · play!

Robot shaky, or the micro:bit restarts? Use a battery pack.
